

AlertMaster Combo

Ameriphone AM6000 and AlertMaster® Wireless Notification System

If you would prefer to have all your alerting controls in one place, a device such as the AM6000 can alert you to telephone calls and the doorbell, and has optional accessories that can alert you to an audio alarm, a crying baby or the presence of an intruder. Since this unit plugs in, no hardwiring is required.

Features include:

- Lamp flasher and bed shaker to alert you to activities within the home
- Lighted LEDs that indicate ringing telephone, alarm clock, doorbell, loud sound, motion sensor or audio alarm (may require optional accessories)
- Bed shaker for night-time notification
- Wireless doorbell
- Distinct flashing patterns and lighted icons to distinguish between the telephone and the doorbell

Ameriphone AMRX2 AlertMaster® Wireless Remote

For use with the AM6000 AlertMaster® Notification System. Connects for flashing lamp and LED icon notification anywhere within 80 feet of base.
