

Gentex Smoke Alarm/Detector with Visual Signal

Model # 7109LS

Unlike other smoke detectors that are hardwired into the home system, the Gentex Model 7109LS is an example of a portable smoke detector designed for people who are hard of hearing. It is equipped with a 9 foot line cord that plugs into any room. This model is a single-station smoke alarm/detector that uses a photoelectric sensor to provide an early warning of smoke. It has a very bright strobe light (177-candela) and a very loud horn (90-decibels). There is a battery backup for the horn.
