

Shake Awake Vibrating Alarm Clock

Do you worry about having to wake up in the morning when you're traveling? The Shake Awake is one of several portable alarm clocks designed for people with hearing loss. The clock is compact but has a strong vibrating motor. Front cover folds under to become a stand for your table top or closes to protect the buttons when sleeping or traveling.

- Compact size (3" x 2-1/2" x 1-1/8")
- Battery operated (2 AA batteries not included)
- Large 1" x 2" green LED display
- Light for nighttime viewing
- Adjusts to either 12 or 24 hour clock setting
- Vibrator and clock have independent battery supplies
- Chain strap with clip for attaching the clock to your pillow, bed, chair or any place you may want to secure it
