

T-Link Hands-Free Dual Silhouette Headset

T-Link is a simple and discreet hands-free silhouette headset with built-in microphone that gives hearing aid users interference-free use of cellular and cordless phones.

Suitable for use with all types of hearing aids or cochlear implants with a t-coil, the T-Link can be used with most phone types.

Batteries are not required for operation.

An adapter may be needed if the phone does not have a 2.5mm jack plug.

At less than 2mm thick, the T-Link is comfortable to wear with BTE hearing aids and eyeglasses.
