

UniVox 2A+ Home Cushion Loop Amplifier

The UniVox 2A+ is a discrete and powerful loop amplifier with advanced technology. The small size together with new automation functions makes it easy to use. Flexibility and user friendliness together with high quality are priority features.

Automatic electronics - The advanced technology output gives the correct frequency response for both loop and headphones, while the dual action AGC circuits switches between fast and slow attack time to give a steady and clear output for the highest intelligibility. Separate bass and treble controls give the correct tonal quality.

- Three outputs - loop-pad, room-pad, earphone
- Green light shows loop is working
- Yellow light shows power is on
- Comes as a complete boxed package
- Can be installed in cars
