

CapTel 2400i

The CapTel 2400i shows captions of everything your caller says, letting you hear what you can over the phone and read what you need to. Designed for people who are comfortable with touch-screen technology, the CapTel 2400i features a large easy-touch display with multiple font sizes and colors for easy reading. It connects to your telephone service like a traditional phone and to your high-speed Internet service to provide the captions.

Captions are provided by a free service that connects to the call (over the Internet connection) to display word-for-word captions of everything a caller says.

Features

- Large touch-screen display
- Multiple font sizes & colors
- Captions can be turned on/off as needed
- Custom tone control for optimal hearing
