

Comfort Duett

Comfort Duett is a small, rechargeable assistive listening device that amplifies speech and sounds from a variety of sources like TV, radio, and telephone.

The base unit serves as an overnight charger and as an interface to audio equipment such as your TV and telephone.

Comfort Duett can be used with headphones, earbuds or a neckloop for those who use hearing aids with a built in T-coil.

Features

- Operating Time: Up to 20 hours, depending on volume level
- Charge time: 1 hour charge = 1 hour use; (14 hours from empty to fully charged)
- Built-in T-coil: Can be used in public areas that have induction loop system installed
